

Observed coral mortality as at 2 June 2016

Mortality level

- ▲ Very High: >50.0%
- ▲ High: 30-49.9%
- ▲ Medium: 10-29.9%
- ▲ Low: >0.1-9.9%
- ▲ None: 0%

Note: Data is based on surveys conducted between 1 March 2016 and 27 May 2016. Since surveys were last conducted around Lizard Island, further mortality has been reported on reefs at this location. Initial estimates indicate mortality levels are likely to have increased.
